## Acknowledgement

The satisfaction and euphoria that accompany the successful completion of any task would be incomplete without mentioning the names of people who made it possible, whose constant guidance and encouragement crowns all efforts with our success.

I extend my gratitude to **Globsyn** for providing me with excellent infrastructure and awesome environment that laid potentially strong foundation for my professional life.

I would like to express my profound thanks to **Mr. Ashok Gupta**, who guided me throughout the project tenure, provided me each and every details, references, and technical helps without which it was impossible to complete this project.

On the very outset of this report, I would like to extend my sincere & heartfelt obligation towards all of my group-mates who have helped me in this endeavor. Without their active guidance, help, cooperation & encouragement, I would not have made headway in the project.

I also acknowledge with a deep sense of reverence, my gratitude towards my parents and member of my family, who has always supported me morally as well as economically.

Any omission in this brief acknowledgement does not mean lack of gratitude.

# **Domain Description**

## **Customer Domain:**

Browsing through items:

The customer will be given a web interface which allows easy browsing through the different rooms. Basically, the items in the shop are well designed and well presented. So that, a user can find his required items easily.

Item Selection:

In the CART, when a customer selects a particular item, this item is stored, and the customer has the facility of deleting the item, which is not necessary to him.

Queries and decisions:

The customer is allowed to post queries about products available and discuss product sold online.

## **Admin Domain:**

Shop modification:

Admin is allowed to add items to his shop and make modification to items.

Order list:

Admin is allowed to see the order list and can also update the status of orders by sending email to the users.

Query Solve:

Admin is allowed to receive the queries of users and also can solve their problems by solving their queries.

User blocking:

Admin can block any user.

## **Problem Definition**

At first we have to face a problem that to know which user access our site at a particular time. To overcome this problem, we decided to store user id per user entered in our site. For this, we make user id as primary key. To get sequentially user id per user entered, we make user id as auto generated. So that, we easily get user id per user access our site by log in.

## **Functional Requirements**

For adding new items, Admin has to log in first to control the further assessment. After this, admin can select ADD option for adding something. He can add the category, brand, product name as he like.

Simultaneously, EDIT and DELETE option work.

## **Hardware Requirements**

Hardware requirements for Insurance on internet will be same for both the parties which are follows:

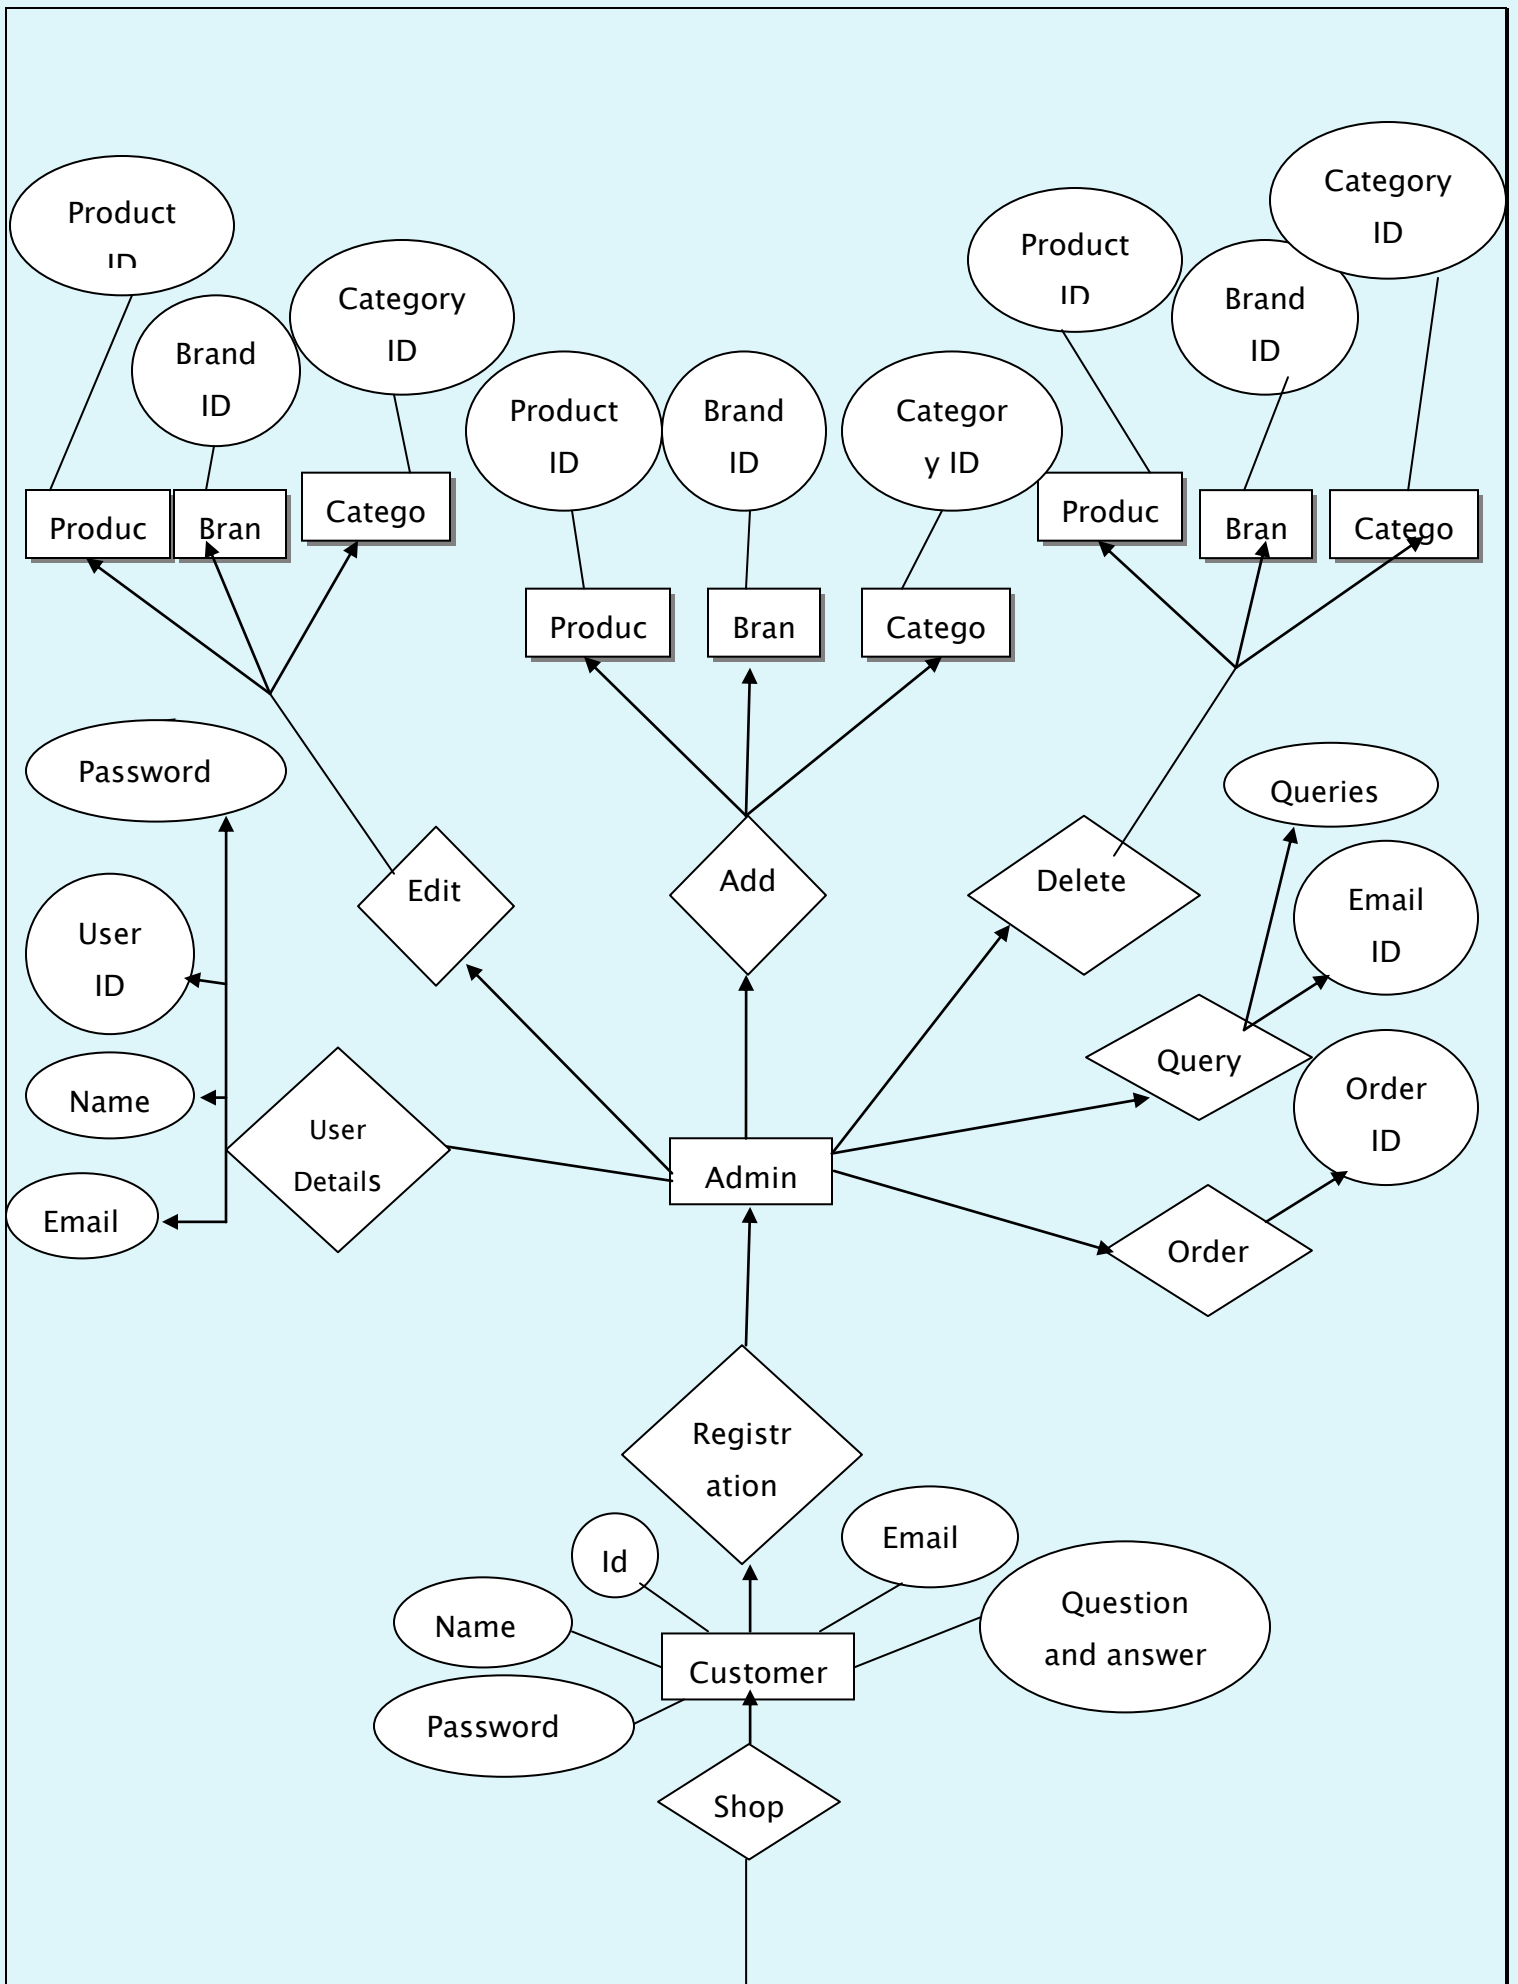

- Processor: - Pentium I or above.
- RAM: - 128 MB or above.
- HD: - 20 GB or above.
- NIC: - For each party

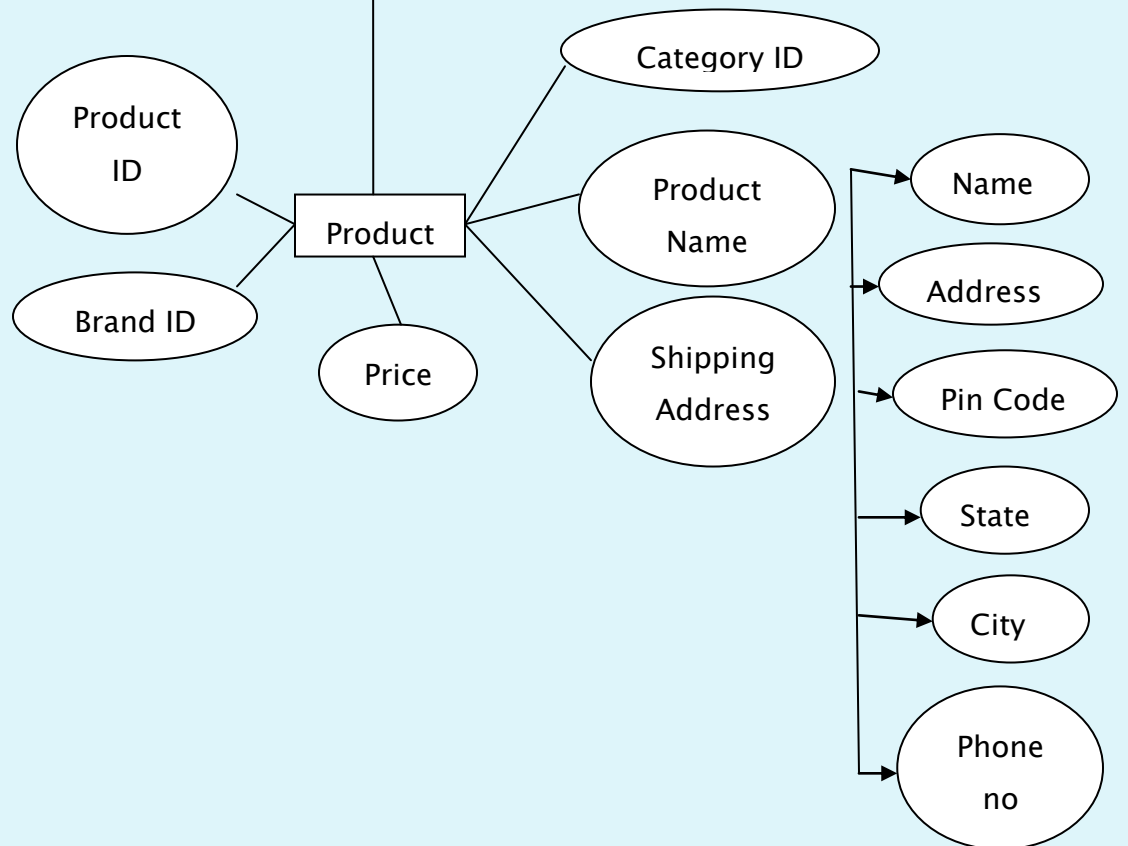

## **Software Requirements**

Software required to make working of product is:-

- Operating System: Windows XP/vista/7 or later version which supports networking.
- Visual Studio 2010 and above with .NET framework 4.0 and above.

## **ER Diagram**

## Table Description

### User Details Table

	Column Name	Data Type	Allow Nulls
	userid	int	<input checked="" type="checkbox"/>
	name	varchar(60)	<input checked="" type="checkbox"/>
	address	varchar(50)	<input checked="" type="checkbox"/>
	dateofbirth	int	<input checked="" type="checkbox"/>
	country	varchar(15)	<input checked="" type="checkbox"/>
	state	varchar(15)	<input checked="" type="checkbox"/>
	city	varchar(15)	<input checked="" type="checkbox"/>

## ABOUT US

Our vision, at e-SHOP, is to be Earth's most customer centric company; to build a place where people can come to find and discover virtually anything they want to buy online. With e-SHOP.com, we endeavour to build that same destination in India by giving customers more of what they want – low prices, vast selection, fast and reliable delivery, and a trusted and convenient experience – and provide sellers a world-class e-commerce platform.

Customers can now shop with confidence from any seller on e-SHOP.com and benefit from a safe and secure online ordering experience, convenient electronic payments and cash on delivery, easy returns, e-SHOP's customer service with 24x7 support, and a globally recognised and comprehensive purchase protection provided by e-SHOP's A-to-Z Guarantee. We launched with Books and Movies & TV and have expanded our offerings to include the Kindle family of E-Readers, Tablets and eBooks; Mobiles & Accessories; Cameras & Photography and Portable Media Players. It is still "Day 1" and we will relentlessly focus on expanding selection and raising the bar for customer experience in India. In Feb 2012, e-SHOP Seller Services made its foray into the Indian market with the launch of Jungle.com, enabling retailers in India to advertise their products for free to millions of Indian shoppers and drive targeted traffic to their stores. With the introduction of the e-SHOP.com marketplace and launch of two new programmes – 'Sell on e-SHOP' and 'Fulfillment by e-SHOP' – sellers across India now have access to unlimited and free 'virtual shelf space' and a scalable, pay-as-you-go fulfilment and customer service offerings. Both programmes have successfully been used by more than two million sellers globally to sell to over 200 million customers worldwide and boost their sales. We will continue to strive to become a trusted and meaningful sales and logistics channel for retailers of all sizes across India by doing the heavy lifting, enabling them to focus on their core business functions and efficiently grow their business online. e-SHOP.com is operated by e-SHOP Seller Services Private Ltd, an affiliate of e-SHOP.com, Inc. (NASDAQ: AMZN).

e-SHOP.com, Inc. is a Fortune 500 company based in Seattle, that opened on the World Wide Web in July 1995; and today offers Earth's Biggest Selection. e-SHOP and its affiliates operate websites, including www.e-SHOP.com, www.e-SHOP.co.uk, www.e-SHOP.de, www.e-SHOP.co.jp, www.e-SHOP.fr, www.e-SHOP.ca, www.e-SHOP.cn, www.e-SHOP.it, www.e-SHOP.es and www.e-SHOP.com.br. As used herein, "e-SHOP.com", "we", "our" and similar terms include e-SHOP.com, Inc., and its subsidiaries, unless the context indicates otherwise.

*Developed By: Mrinmoy, Jaya, Parvez, Sonali, Sunny*

### OUR VISION

*Our vision, at E-Shop is to be Earth's most customer centric company; to build a place where people can come to find and discover virtually anything they want to buy online. With E-Shop.in, we endeavour to build that same destination in India by giving customers more of what they want – vast selection, low prices, fast and reliable delivery, and a trusted and convenient experience – and provide sellers a world-class e-commerce platform.*

*Customers can now shop with confidence from any seller on E-Shop.in and benefit from a safe and secure online ordering experience, convenient electronic payments and cash on delivery, easy returns, E-shop's customer service with 24x7 support, and a globally recognised and comprehensive purchase protection provided by E-Shop's A-to-Z guarantee.*

*We launched with Books and Movies & TV and have expanded our offerings to include the Kindle family of E-Readers, Tablets and Mobiles & Accessories; Camaras & Photography and Portable Media Players. It is still "Day 1" and we will relentlessly focus on expanding selection and raising the bar for customer experience in India.*

## **FUTURE SCOPE OF PROJECT**

This product has great future scope. Online shopping Internet software developed on and for the Windows and later versions environments. This project also provides security with the use of Login-id and Password, so that any unauthorized users cannot use your account. The only Authorized that will have proper access authority can access the software.

The project made here is just to ensure that this product could be valid in today real challenging world. Here all the facilities are made and tested.

Currently the system works for limited number of administrators to work. In near future it will be extended for many types of insurance policies so that efficiency can be improved.
